

## Using the iPad to Access an ASL Interpreter

- Ask the Nursing Clinical Coordinator for the iPad, which is stored in the clinical coordinator's office.
- Turn the I-Pad on by pressing the Home button or the power button (located on the top of the device, on your right). Move the slide bar in the direction indicated to arrive at the home screen.

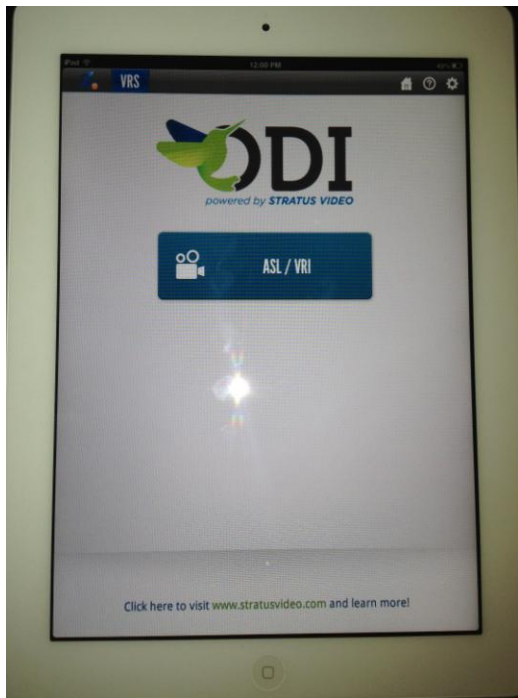

- Once at the home screen, simply tap the ODI icon/app.  to take you to the ODI log-in page.

- On the ODI Log in Page, simply tap the  bar.

*You will then be connected to an interpreter. (This may take a few seconds. You will also hear a recording while waiting to be connected which says, “Welcome to ODI - a sign language interpreter will be with you shortly.”)*

Patient

*Once the interpreter appears on the screen, and the device/I-Pad has been properly positioned in front of the patient, so that both patient and interpreter are clearly visible to each other; you may begin speaking in your regular voice to communicate with the patient via the interpreter. You do not need to look at the screen, simply be close enough to effectively hear the interpreter and so that the interpreter can effectively hear you.]*

**Also, once the interpreter is on the screen, that interpreter's Name and ID number will appear directly below his/her window. Please record this information in patient's chart.**

- Once the session has been completed, simply tap on the on the top left corner of the screen (your right), and touch the red, downward facing arrow to hang-up or end the call.

**Please make sure that the iPad is charged and ready for the next user.**
